

MPD24

THE ULTIMATE RHYTHM CONTROLLER

PAD CONTROL REDEFINED.

Akai Professional's MPD 24 is the velocity sensitive pad controller for musicians and DJs. Modeled after the landmark MPC series, the MPD24 allows for an extremely expressive and intuitive solution to percussion and rhythm programming.

With 16 MPC-style velocity and pressure sensitive pads, four selectable pad banks for a total of 64 playable pads, six assignable faders and eight assignable, 360° knobs for transmitting MIDI Control Change data, the MPD 24 provides unprecedented creative freedom for manipulating sampled material. The MPD24 also features transport controls for interfacing with DAW/sequencing applications. The MPD24 is a fully programmable controller and multifunctional tool that fits perfectly within any production or performance environment.

FEATURES
